

HOW TO: Execute the PTO APP SQL Script

Intent:

This document outlines how to deploy the accompanying PTO App SQL script.

NOTE:

While Xalt is providing instruction on how to import and execute the included SQL scripts Hexagon, Xalt, Catavolt, take no responsibility for lost, corrupted, overwritten, or otherwise unintended data changes, due to incorrect or incomplete execution of the included instructions.

We HIGHLY recommend a Database Administrator complete these steps.

How to Deploy pto_sql_script.sql:

1. Right-click the destination database and select **New Query**. Or, from the **File** menu select **New Query**.
2. Open pto_sql_script.sql in notepad or your preferred text editor, select all and copy the contents in its entirety.
3. In the Query Editor window Right-click anywhere in the Query Editor and paste the contents pto_sql_script.sql into the Query Editor Window and click Execute.

This should create the following objects:

Tables:

employee_bc_payrollperiod
employee_pto_document_conversation
employee_pto_accrual
employee_pto_accrual_hist
employee_pto_accrual_info
employee_pto_balance
employee_pto_dow
employee_pto_emp_accrual_rate
employee_pto_emp_rate
employee_pto_holiday
employee_pto_request
employee_pto_size
employee_pto_status
employee_pto_temp_table
employee_pto_type
employee_resource_role
employee_resource_type
employee_resources

HEXAGON

Views:

manager
employee_pto_payrollperiod_accrual_info
employee_pto_emp_current_accrual_info

Stored Procedures:

sp_create_email_notification
sp_create_push_notification
sp_pto_submit_request
sp_pto_create_request
sp_pto_change_request
sp_pto_cancel_request
sp_update_push_notification
sp_pto_delete_request
sp_pto_approve_request
sp_pto_reject_request
sp_pto_run_accrual
sp_pto_undo_accrual
sp_pto_yearly_request_data
sp_pto_employee_yearly_pto_data

Once all of these objects are imported we will be ready to import the PTO App import package into Xalt Cloud Server.
