

SQL Script Payload:

The accompanying SQL script will create the following objects in the destination SQL database. Modification of the script, or changing of the table, view, stored procedure, or property names will impact functionality of the application and will not be supported. Consulting hours can be purchased if custom table objects or stored procedures are required.

Tables:

inspect_audit_event_journal	inspect_final_inspection_items
inspect_audit_header	inspect_hold_codes
inspect_audit_item_vehicles	inspect_inspection_plan
inspect_audit_items	inspect_inspection_plan_items
inspect_audit_plan	inspect_inspection_type
inspect_connection_test	inspect_item_choices
inspect_cvpl_item	inspect_item_linked_departments
inspect_cvpl_item_note	inspect_master_choices
inspect_cvpl_os	inspect_master_departments
inspect_cvpl_project	inspect_master_features
inspect_cvpl_status	inspect_master_items
inspect_upload_audit_items	inspect_master_locations
inspect_upload_audit_plan	inspect_master_models
inspect_company_code	inspect_master_zones
inspect_customer_order	inspect_model_floorplan_inspection_types
inspect_event_codes	inspect_model_floorplans
inspect_audit_event_journal	inspect_production_line
inspect_event_journal	inspect_user_position
inspect_final_inspection_header	inspect_vehicle_inspection
inspect_final_inspection_item_choices	

Views:

inspect_dashboard_fii_count_pass_vw	inspect_fiia_main_saved_vw
inspect_dashboard_fii_count_summary_vw	inspect_fiic_count_vw
inspect_dashboard_fii_count_total_vw	inspect_final_inspection_dashboard_nc_by_location_vw
inspect_dashboard_fii_result_pct_vw	inspect_inspections_not_released_by_order_vw
inspect_dashboard_items_journal_vw	inspect_inspections_released_by_order_vw
inspect_dashboard_nc_attrib_count_vw	inspect_ipi_view_vw
inspect_dashboard_nc_count_loc_vw	inspect_mi_no_attribute_vw
inspect_dashboard_nc_count_pl_vw	inspect_mi_no_inspection_plan_vw

Application demo data.

The SQL script (2 – quality_inspection_demo_data.sql) will load a small set of master data and inspection plans into the Quality Inspection application.

This will provide the ability to view how data is entered and linked in the application, and will also enable inspection plans to be executed within the application.
